LARIOS TRES LEGAL
DEFENSE & LITIGATION
MÁLAGA - MADRID

1. ABOUT US

Larios Tres Legal S.L.P. came into being as an independent division of legal professionals from our parent company, *Larios Tres Consultores S.L.*, in response to an exhaustive market study of the sector and years of experience acting as consultants and providing legal advice for investments in both Spanish and foreign real estate and business sectors.

We strive to give our clients - small and medium enterprises - the peace and convenience of being able to rely on an excellent legal firm, so that they can outsource any type of legal problem in the knowledge that they are paying the most competitive rates in the sector.

At *Larios Tres Legal* we follow a policy of continuous reinvestment, which means we use the latest IT and management systems. Thanks to this, we maintain maximum efficiency on a daily basis, comply with time management objectives and minimise costs so that extra expense is not passed on to our clients.

With this new division exclusively focused on legal issues and fully independent of its parent company, we are embarking on a new line of business to satisfy needs that have arisen in the market for a specific client target group: franchisees and SMEs that, on a limited budget, require a continuous legal service, whether just for consultation or for litigation solutions of all kinds.

Our head office is in the centre of Malaga city, between Marqués de Larios Street and the Plaza de la Marina, and from here we cover our clients' interests throughout Andalusia and Portugal.

We work with a number of professional colleagues: attorneys highly specialised in other areas of law, accountants, architects, professional experts, private detectives, psychoanalysts, etc., in order to offer our clients every possible support for any type of legal proceedings, in- or out-of-court, when it comes to documentary evidence, analysis of the opposing party's strengths and weaknesses or negotiation to avoid, whenever possible, going to trial.

ADDED VALUE

We believe it is important for clients to be able to defend themselves. This is why we inform and guide our clients so that they can protect themselves as far as possible against situations that, on most occasions due to lack of knowledge, would never have arisen had they been prepared.

Likewise, at no extra cost, we provide our clients with constantly updated guidelines about different subjects.

EFFICIENCY & CONTINUOUS UPDATING

We maintain an exhaustive control of time management, which contributes to our efficiency.

We are also strict about our professionals keeping up to date, whether this is with the latest legislation, new technologies or tools for professional development.

TECHNOLOGY & NETWORKS

CONTINUOUS REINVESTMENT AND RENEWAL

At Larios Tres Legal we believe in the necessity of maintaining a strict policy of renewal, both in matters of legislation and legal tendencies, and in new technologies and social networks, so that adaptation to the developing needs of our clients can be profound, fast and complete.

We use the highest quality IT equipment and databases in conjunction with file treatment and management programmes to enable transparent efficiency of time management. We constantly update our Internet presence, bringing our clients daily and weekly analyses of the most recent developments in areas that may be of interest to them.

HARPER'S SHIELD

3. HARPER'S SHIELD

HALLMARK & GUARANTEE

Due to the current situation in the advocacy sector, law firms should be highly competitive.

They have to overcome the distrust of the regular user of its services against the innumerable abuses of certain law firms, which damage day to day image of the sector under real inability to curb this situation by various professional associations despite their efforts.

In this context it arises Harper's Shield as a seal from the private sector with the clear purpose to unify and support all those firms seeking their place in the market through the union of synergies at the national and international levels.

Transparent dialogue with all of the parties involved is what marks our difference from our competitors.

Likewise, Harper's Shield certifies other associated legal firms, to create a network of synergies at both national and international level, making it easier to manage our clients' interests while respecting quality requirements and facilitating the mobility and workload of our professionals, all of which is reflected in the services we offer our clients.

ENTREPRENEURSHIP – IT – SOCIAL MEDIA

There are three principles that sustain the DNA of our Firm: disruption, innovation and excellence. Therefore, since its inception, *Larios Tres Legal SLP* has invested a large part of its resources and equipment in the technology and personal development of its members. Also, the office accompanied a large number of start-ups and entrepreneurs in their journey towards professional and business success.

All this makes *Larios Tres Legal SLP* the chosen Law Firm by the main entrepreneurs and influencers at a national and European level.

The detailed knowledge in the operation of social media networks. Advice on the development of **business plans** for several **Start-ups** in order to achieve better private or public financing (banks, crowdfunding, public aid, incentives, etc.). The research in the elaboration of **market studies**. And the advice on the Blockchain technology and the **Cryptocurrency**. It has made us the Spanish Law Firm with which *millennials* of all rank and profile want to work, collaborate and / or contract with.

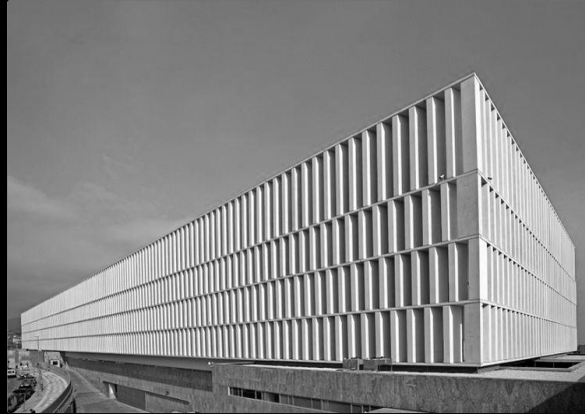

A dark, moody photograph of a person's hands holding a camera with a 50mm lens. The person has long, dark, wavy hair. The background is dark and textured.

We add value to your project through our **network** of contacts inside and outside the Firm in order to maximize the opportunities for success. In the same way that we create synergies between clients and interested collaborator, we establish an environment that generates personal, professional enrichment, and multilateral business, based on the “**win-win**” paradigm. What is only possible to achieve by rigorously applying of the **deontological code** of the Spanish Lawyers in a **global market** without frontiers of this new **society 3.0**.

And lastly, we establish personal and professional growth programs both for colleagues in the firm, as well as other interested external attorneys, in order to train the oratory, psychology, technics of negotiation, emotional intelligence and instrumental skills applied to the field of their profession, either in the sphere of litigation, as in any other business sector.
